STARTUP AND IDEA FEST 2026

Venue: Anupam Foodland
Date: Mangsir 3, 2083
Organized by: Living with ICT & The Squad of ChangeMakers (TSCM Aerospace)

AI and Space Conference + STEAM, Astronomy and Aerospace Camp

About the Event

The event will feature two major segments. The first segment will focus on the **Startup Exhibition**, while the second segment will bring together the **AI and Space Conference** and the **STEAM, Astronomy and Aerospace Camp**.

The **AI and Space Conference** will be conducted as a **one-day conference**, with the program running for approximately **two hours** on **Mangsir 3, 2083**.

The conference will focus on emerging possibilities in space technology, particularly:

- **Building and operating data centers in space**
- **The use of Artificial Intelligence in space exploration**
- AI-assisted spacecraft and mission operations
- Future applications of space-based computing
- Opportunities and challenges in Nepal's aerospace and space-tech ecosystem

The conference will provide an opportunity for participants to listen to experts, exchange ideas, and discuss the future of AI and space technology.

STEAM, Astronomy and Aerospace Camp

As part of the event, a hands-on **STEAM, Astronomy and Aerospace Camp** will be conducted for approximately **100 participants from 20 different schools and colleges**.

The camp will provide students with practical exposure to emerging technologies through specialized workshops, including:

1. **RC Aircraft Workshop**
2. **FPV Drone Workshop**
3. **Astronomy Workshop**
4. **Advanced Robotics Workshop**
5. **Nano Satellite Workshop**

The workshops will emphasize **learning by doing**, allowing participants to design, build, experiment, operate, and demonstrate technology-based projects.

Project Demonstration

One of the major attractions of the event will be the **demonstration of products and projects developed during the workshops**.

Participants will have an opportunity to showcase what they have built and demonstrate their understanding of aerospace, robotics, astronomy, electronics, AI, and other emerging technologies.

This will allow students to move beyond theoretical learning and experience the complete process of **idea → design → development → demonstration**.

Technology Exhibition

Alongside the workshops and conference, visitors will be able to explore an exhibition of advanced technology and aerospace products.

The exhibition will feature technologies such as:

- Heavy-lift drones
- Agricultural drones
- FPV drones
- Robotics systems
- Satellites and satellite-related technology
- Large and small telescopes
- Large fixed-wing UAVs
- IoT devices
- Rockets and rocket-related technology
- Other aerospace and emerging technology products

The exhibition will provide students and visitors with an opportunity to see advanced technologies up close and understand their potential applications.

Open Participation

The **AI and Space Conference** will be open **free of charge** to participants of the STEAM and Aerospace Camp as well as other interested individuals, subject to available capacity.

The program is intended to encourage young people, students, educators, technology enthusiasts, and aspiring innovators to learn about emerging technologies and explore opportunities in **AI, aerospace, astronomy, robotics and STEAM**.

On-Spot Games and Activities

To make the event more interactive and engaging, **on-the-spot games and technology-related activities** will also be conducted during the event.

Participants and visitors will have opportunities to take part in these activities and win **small prizes**.

Vision

This event aims to create an environment where **ideas meet technology, students meet innovation, and innovation meets opportunity**.

Through the combination of startups, AI, space technology, STEAM education, astronomy, aerospace, robotics and hands-on project development, the event seeks to inspire young people to become **creators, innovators and problem-solvers**.

The event will provide a common platform where participants can **learn, build, demonstrate, connect and imagine the future**.

Event Highlights

Startup Exhibition | AI & Space Conference | STEAM Camp | Aerospace Workshops | Astronomy | Robotics | RC Aircraft | FPV Drones | UAVs | Satellites | Rockets | Telescopes | IoT | Technology Demonstrations | On-Spot Games
